## **Instructions**

1. Read the page “Codes” if you have not already done so (<http://www.celmina.com/fiction/codes>).
2. Print the first two pages of this document to get the code wheel slips.
3. Cut the code wheel columns. You will have 24 numbered slips (corresponding to the wheels of the code).
4. Using the numbers provided, arrange the slips in order according to the code text in the story.
5. Move the slips up or down as needed to match the letters across as per the code text.
6. Once the code text is arranged, look on the lines above and below for a familiar English word (if you need a hint, see the bottom of this page).
7. Once you have located the word, the preceding text will provide the rest of your answers. To separate out the two names before the English word, look at a map of Latvia prior to the Second World War (this map is recommended - [http://upload.wikimedia.org/wikipedia/commons/9/9b/Latvijas\\_apri%C5%86%C4%B7i\\_1924-1945.png](http://upload.wikimedia.org/wikipedia/commons/9/9b/Latvijas_apri%C5%86%C4%B7i_1924-1945.png)) to find the second name. Then the remaining text (at the beginning of the line) will be the first name.

Good luck!

\*The English word you are looking for is PARISH. The first word in the line will be the farm name, the second word in the line will be the parish name.
